Github: <https://github.com/Nitnr0306>

Email: nitnr0306@gmail.com
Mobile: +91-6304454756

SKILLS

Programming Languages: Java, C++, C, JavaScript
Web Technologies: HTML, CSS, React.js, REST APIs
Backend Framework: Spring Boot (MVC, JPA, Hibernate)
Databases: MySQL
Version Control & Tools: Git, GitHub, Postman
Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, DBMS
Soft Skills: Team Collaboration, Time Management, Adaptability

PROJECTS

Managio | SaaS Business Management Platform | [View App](#) | [GitHub](#) January 2026 – February 2026

- Developed a **multi-tenant SaaS platform** for gym/fitness businesses managing members, staff, and payments across 3 user roles, 6 staff types, and **30+ granular permissions** with fully isolated business tenants.
- Implemented **3 JWT-based authentication flows (Owner, Staff, Member)** with refresh token rotation, 5-attempt logout, **BCrypt encryption, token blacklisting** and a 72-hour staff invitation onboarding pipeline.
- Built 12+ REST API modules with **50+ endpoints** covering Subscriptions, Payments, Audit Logs, and Role-Based Dashboards, with **automated daily cron jobs** for subscription expiry and reminders at 1, 3, 7-day intervals.
- Optimized data layer with 15+ custom JPQL queries, **20+ indexed columns** across 12 entities, optimistic locking, soft deletes, and a CSV bulk import/export pipeline processing **1,000+ records** with row-level error handling.
- Tech Stack:** Java 17 + Spring Boot 3, Spring Security + JWT, JPA/Hibernate + PostgreSQL, BCrypt + Token Blacklisting

Dice Game | Console-Based Multiplayer Game | [GitHub](#) January 2024 – February 2024

- Engineered a console-based multiplayer dice game in C++ supporting 2–4 players with structured turn-based gameplay, enabling seamless execution across **100+ consecutive game rounds** without runtime errors.
- Built **automated score tracking** and dynamic winner determination logic using structured conditional flows and cumulative scoring mechanisms, **eliminating manual score calculations by 100%**.
- Refactored game logic into modular functions, **reducing code redundancy by approximately 30%** and improving maintainability and readability.
- Incorporated input validation and boundary checks, **minimizing invalid user input errors by 90%+ during testing**.
- Tech Stack:** C++, OOP Concepts, Control Structures, Arrays, Functions, Console Application

CERTIFICATES

Data Structures and Algorithm - [CipherSchools](#) July 2025
Introduction to Hardware & Operating Systems - [Coursera](#) September 2024

ACHIEVEMENTS

- Secured a **3-Star rating in Problem Solving** on Hacker Rank, demonstrating strong fundamentals in **data structures and algorithms** June 2024
- Achieved a **2-star rating in Python on HackerRank**, validating coding proficiency and core language understanding. March 2024

EDUCATION

Lovely Professional University Punjab, India
Bachelor of Technology - Computer Science and Engineering — **CGPA: 7.36** August 2023 – Present
Gayatri Junior College Srikakulam, Andhra Pradesh
Intermediate; **Percentage: 81.5%** April 2021 – March 2023
Bhashyam High School Palasa, Andhra Pradesh
Matriculation; **Percentage: 99%** April 2020 - March 2021
